

How to Make Your Own Milk Mug

What you'll need

- Pencil
- Paper
- Permanent markers, in a variety of colors
- Porcelain dishes (we recommend a mug or a bowl)
- Oven, to set the ink

Steps

1. Gather all materials listed above and begin preheating oven to 350°
2. Get creative and start sketching ideas of what you will include on your personalized mug or bowl. We had fun doodling our name, some of our favorite things and drawing silly designs!
3. Once you have your great idea, draw the design on the porcelain dish with the permanent markers. If you make a mistake, dab nail polish remover on the area to easily erase the flaw.
4. Once your design is complete, bake the porcelain items in the oven for 30 minutes with the oven set at 350°.
5. When the buzzer rings, take the items out and let them cool completely. Then enjoy!
